

Cybersecurity Policy

PeptiDream Group works in close collaboration with multiple R&D partners for a number of drug discovery programs. At PeptiDream, therefore, all executives and employees recognize the importance of information security and regard that setting a high standard of information security is essential for the sustainable growth of the company. As such, this policy hereinafter prescribed is set to protect PeptiDream Group's information asset including client and personal information it handles in order to protect it from possible cybersecurity threats and risks involved.

1. Scope of application

This policy is applied to all board members and all employees of PeptiDream Group and covers every piece of information which is under its control in relation to its operating activities.

2. Our actions

We specifically adhere to the following;

- We duly comply with relevant cybersecurity laws, regulations and guidelines set forth by the government.
- We work on developing and operating appropriate cybersecurity management system.
- We strive to prevent and to detect risks and issues related to cybersecurity.
- In case an incident in relation to cybersecurity occurs, we shall handle it promptly and appropriately and take necessary steps to prevent a recurrence of similar incidents in future.

- We provide continual education and trainings for all employees to promote high cybersecurity awareness so that they can keep abreast of the cybersecurity-related risks and recognize their importance.
- We timely review cybersecurity-related operations and activities to make a continuous improvement.
