

Policy on Social Contribution

PeptiDream Group's mission is "Discovering the next generation of transformational medicine" and so, we commit to serve as a good corporate citizen for society through interaction with a local community and activities which will promote development of industries.

1. PeptiDream Group will carry out social contribution activities for society and local community through participation in various projects of Network Council of KING SKYFRONT, Tonomachi International Strategic Zone in Kawasaki City, and by organizing local community events. We are committed to contribute towards the better town planning of Tonomachi and KING SKYFRONT to make the district even more attractive. In addition, PeptiDream Group will carry out support activities in the areas of education and academia with the goal to promote and pursue development of science and technology, in liaison with public institutions and non-profit organizations.
2. PeptiDream Group will carry out social contribution in the areas of drug discovery and healthcare by providing environment-friendly and innovative drug discovery technology, and by making the best use of partnerships with different stakeholders. By doing so, we believe that it will consequently lead us to contribute to bring about creations of innovation in a more efficient way on industries-wide basis. We believe that accelerating innovation will benefit patients suffering from intractable diseases.

3. PeptiDream Group will report on our activities in an appropriate manner to our stakeholders.
